Airport Rail Link: Update on recent developments

By Sarah Tanswell on 31 Aug 2020 11:52 in Enterprise collaboration

In mid-November 2013 Ibu Emma Sri Martini, the Chief Executive Officer of PT Sarana Multi Infrastruktur (SMI), provided some additional information on the SHIA Rail Link project. SMI is the Indonesian state-owned company that has been charged with retaining the experts to prepare the feasibility study. SMI will also conduct the project tender. Ibu Emma's comments suggest that the SHIA Rail Link project is still in its pre-feasibility study stage, but that SMI believes that study will be completed in Q1 2014 and that SMI will offer the project through competitive tender to be held in Q1 2014. If correct, this would suggest that potential consortium members may now be seeking to establish relationships with one another.

However, for several reasons we believe the schedule described by SMI may be ambitious.

We note that public statements from a senior Transport Ministry official made at the end of October 2013 indicated that the pre-feasibility study is being finalized. A news
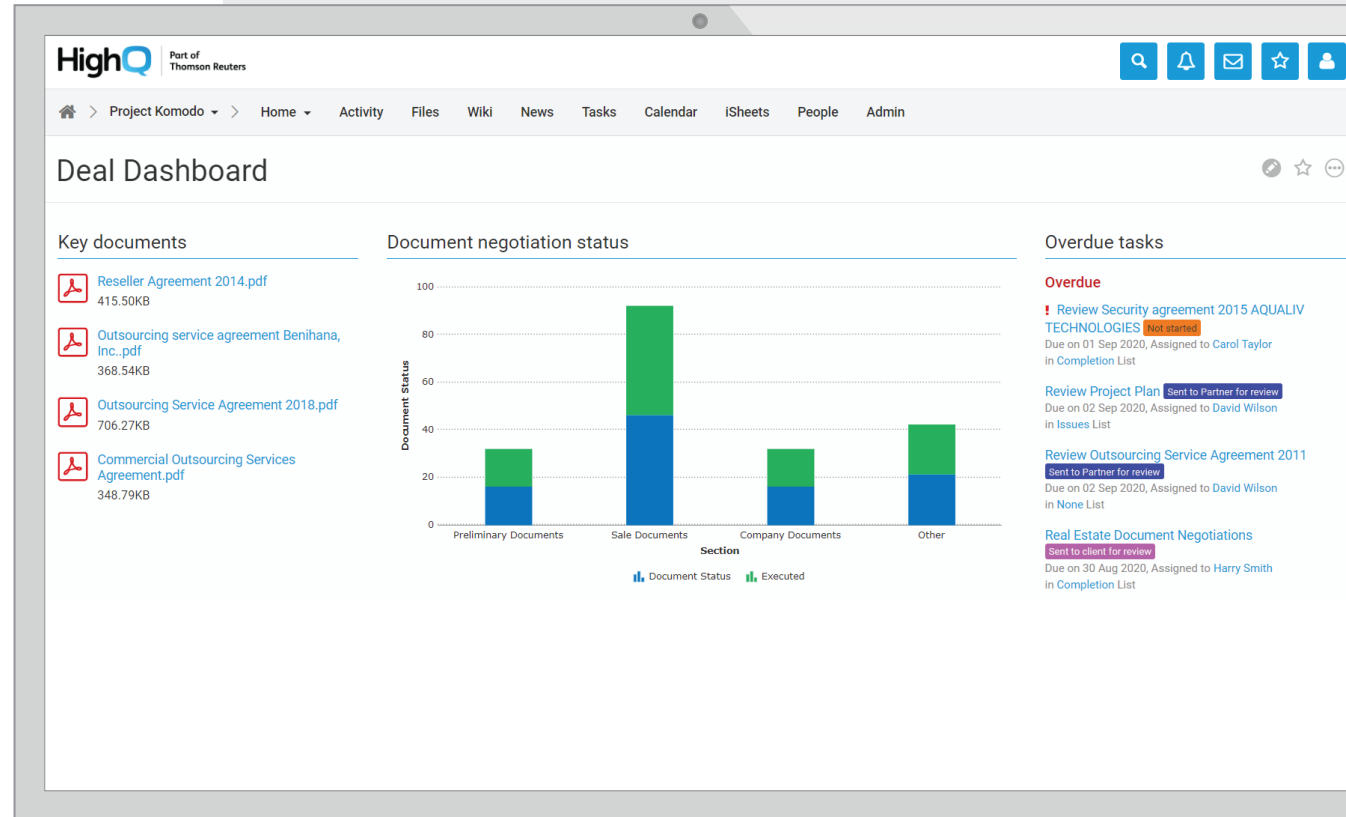

Legal project management

✔ agile task management

✔ resource management

✔ financial dashboards

✔ project status reporting

✔ team collaboration

✔ workflow automation

✔ project planning
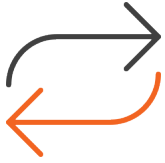

Transaction management

- ✔ deal rooms
