

## Trade Analysis

Managing multiple trade lanes without full, real-time visibility into the risks and landed costs can quickly become costly for a trade department. It can be overwhelming enough just to keep track of the shifting regulations across the countries your supply chain spans, never mind keeping an eye on potential compliance risks that may need to be addressed.

Beyond just compliance activities, it can be challenging to gather the information you need to create a proactive, thoughtful sourcing strategy. When all your time is spent on compliance day-to-day activities, you don't have the resources to plan ahead, spot opportunities for savings, or analyze the impact of a potential new supplier or free trade agreement. Without easy access to current and past data, you can't analyze trends and make strategic recommendations.

### About ONESOURCE Trade Analysis

ONESOURCE™ Trade Analysis includes a comprehensive set of tools designed to provide insight into not only the organization's current state of trade compliance costs and risks, but also the potential opportunities that could be realized through implementing changes to sourcing, sales, and/or distribution strategies.

With ONESOURCE Trade Analysis, you can study trends in your current sourcing or sales model, identify risks, and even quantify potential savings from participation in duty deferral programs. Feel confident in the most up-to-date regulatory information for each trade lane you operate, and free up your time for more value-added activities, such as identifying potential cost savings in your supply chain, quickly flagging risk areas, and scrutinizing your suppliers to ensure your trade lanes are optimized and providing value to your company.

*ONESOURCE Trade Analysis provides organizations with the ability to analyze trade lanes to identify risks and savings opportunities.*

Feature	Activity
<b>Analyze trends</b>	Assess current product assortment to understand ability to leverage reduced-duty shipments from free trade agreements
<b>Identify new opportunities</b>	Compare your sourcing or sales lanes to global trends to plan and implement new import/export strategies
<b>Validate new trade lanes</b>	Calculate part-level actual landed costs with an automated cost rules engine
<b>Scenario plan</b>	Run multiple estimated landed cost scenarios to identify the most cost-effective combination of transportation and compliance cost choices
<b>Access latest regulations</b>	Research documentation and other regulatory requirements of shipping in new trade lanes
<b>Calculate ROI</b>	Quantify potential savings from participation in duty deferral programs
<b>Report on trends</b>	Utilize year-over-year reporting tools to document improved trends in supply chain management
<b>Scrutinize new suppliers</b>	Update Risk Analysis exercise to reflect impact of new supply chain partners
<b>Analyze tariffs</b>	View and compare main/preferential duty rates, future rates, and rules of origin
<b>Automate Country of Origin</b>	Significantly reduce the time needed to qualify for preferential programs or determine non-preferential origin

Across the globe,  
**ONESOURCE**  
Trade Analysis  
helps companies:

- Identify possible compliance risks that need addressing
- Calculate potential savings opportunities through free trade agreements and duty deferral programs
- Study global trade trends to identify new opportunities
- Run multiple scenarios to inform proactive, strategic decision making
- Access the latest regulations for each of your trade lanes, so you feel confident in your compliance

## Free Trade Agreements

Unexpected customs duties can hit your global supply chain costs hard. ONESOURCE™ Global Trade for Free Trade Agreements (FTA) is designed to help you take advantage of FTAs by identifying opportunities to qualify goods under FTA-specific rules of origin. Streamline logistical processes and cut down on manual work, so you can comply with FTA guidelines and reduce or eliminate duties. Our FTA software's unique architecture can accommodate any existing, changing, or future free trade agreements, including NAFTA, CFTA, SFTA, AFTA, ILFTA, JFTA, UKFTA, CAFTA, and TAFTA.

Thrive globally. Compete confidently with ONESOURCE Global Trade Solutions.
