

TRADE AND DEVELOPMENT:

THE EVOLVING RELATIONSHIP BETWEEN MENA AND AFRICA

the answer company™
THOMSON REUTERS®

TRADE & INVESTMENTS

BETWEEN MENA AND SUB-SAHARAN AFRICA

The trade and investment relations between Middle East and North Africa (“MENA”) and Sub-Saharan Africa (“SSA”) have substantially evolved during the past decade, driven by strong economic development, superior demographics and mutual agreements that laid foundations for a larger potential ahead. Such trend is bolstering, over the long-term, the inter-regional economic ties where goods & capital are mutually serving the strategic interests of both regions. Within this context, business synergies are materializing under the form of companies expanding cross-border through their product offerings and through merger & acquisition strategies.

1.1 TRADE OF GOODS BETWEEN MENA AND SSA

Size and Growth Of Trade

Total trade of goods between MENA and SSA (“total trade”) reached peak levels during recent years, having progressed at a pronounced pace. This trend has further entrenched the complementarity between the production and trading ecosystems of both regions and sets the floor for steady potential ahead.

As per data gathered from Thomson Reuters Datastream, total trade between MENA and SSA (graph 1) stood at around \$34 bn in 2015, compared to only \$2 bn back in 1995 and \$13 bn in 2005, growing at double digits: the 20-year and 10-year CAGRs are respectively 15% and 10%.

Graph 1: Total Value of Trade Between MENA and SSA (in bn)

Graph 2: Ratio of Trade to GDP

Source: Thomson Reuters Datastream, IMF (World Economic Outlook Database)

When compared to the size of both economies, total trade outpaced, by large, GDP growth. As shown in graph 2, the ratio of total trade-to-GDP is estimated at respectively 2.3% and 1.4% for SSA and MENA, compared to less than 0.5% decades ago, clearly indicating the growing importance of inter-connectivity between the different countries for the local businesses.

Furthermore, SSA and MENA have been inter-opening up for trade at a faster pace than with the rest of the world. As reported in graph 3, total SSA-MENA trade represented around **5.5% of SSA trade** with its global partners in 2015, versus only 3.8% in 2005 and 1.6% in 1995. Similarly, this ratios stood at **2.0% for MENA in 2015**, versus 1.5% in 2005 and 0.7% in 1995.

Graph 3: Regional Trade / Total Trade With World (in %)

Directional flow of goods

In terms of the directional flow of goods, it is noticeable SSA is a net import partner to MENA. As shown in graph 4 and 6, total exports from SSA to MENA stood at \$6.9bn in 2015, compared to imports from MENA to SSA at \$27.5bn, bringing the net foreign trade balance of SSA with MENA at -\$20.6bn. From a historical point of view, this deficit has been continuously widening, expanding from -\$0.8bn in 1995 and -\$7.8bn in 2005.

Graph 4: Trade Balance Between SSA & MENA (in bn)

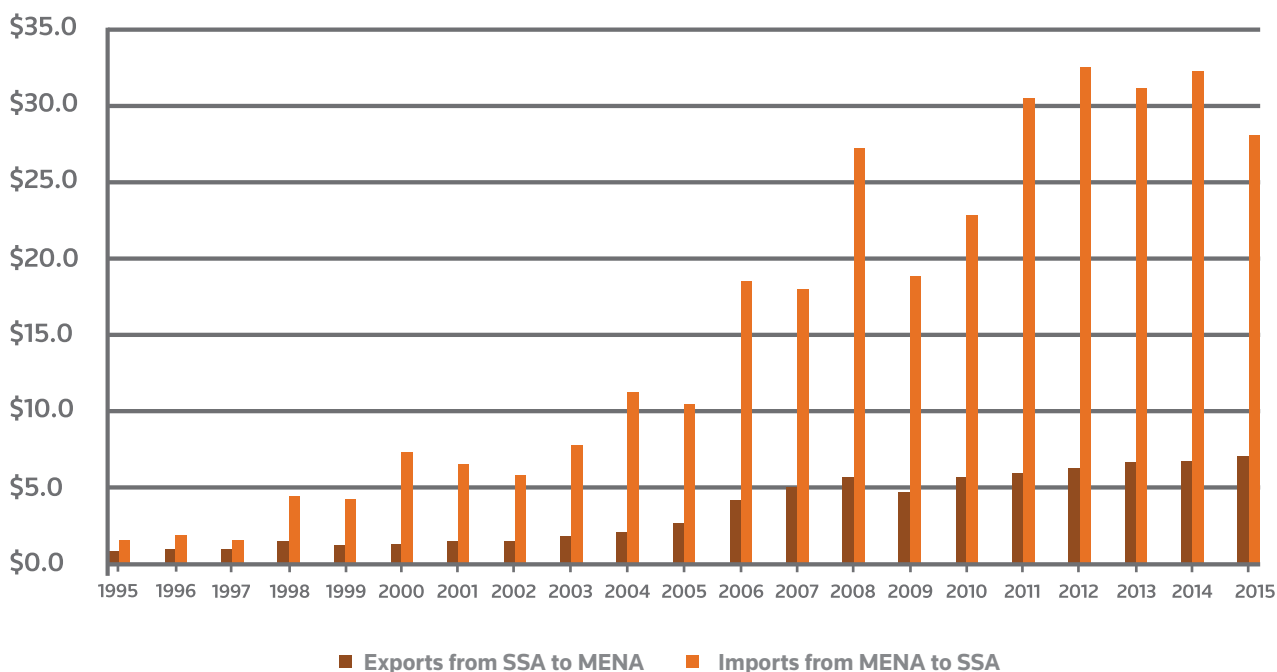

In fact, the graph 5 pictures the share of SSA imports from MENA in total inter-regional trade at around 80% in 2015, having remained intact in the past period. These figures confirm the growing interest by African countries on products coming from the Middle East.

Graph 5: Breakdown of Trade by Directional Flow (in bn)

Graph 6: Total Value of Trade Between MENA and SSA by Directional Flow (in bn)

1.2 TOP PARTNER COUNTRIES

During the past period, selected countries have been the key drivers behind the development of trade between SSA and MENA. Geographies such as UAE, Saudi Arabia, South Africa, Kenya, Nigeria and Ethiopia account for the lion's share of the flow of goods between both directions.

From the Arab region side, as shown in graph 7, UAE was the major trade partner in 2015 with around \$8.9bn, followed by Saudi Arabia with \$6.9bn and Morocco \$1.8bn. Together these countries account for 2/3 of the trade with SSA.

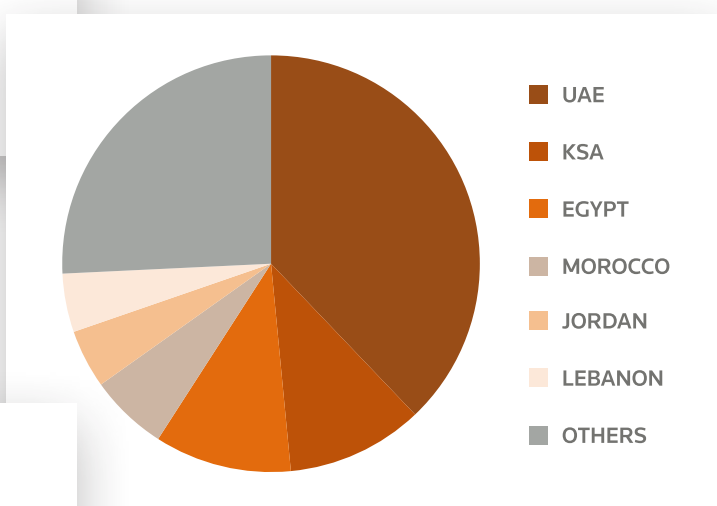

On the export level (graph 8), UAE is the largest destination by far for African products with \$2.5bn or 38% of the total.

On the import level (graph 9), UAE is also the largest source of goods for African economies with \$6.4bn or 31% share of the total, followed closely by Saudi Arabia with \$6.1bn or 29% share; both countries account for 60% of total.

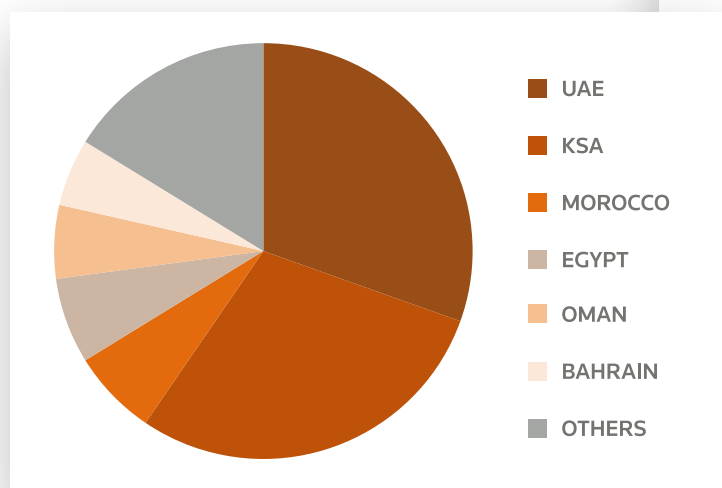

Graph 7: Top MENA Partners of SSA (2015)

Graph 8: Top MENA Export Destinations for SSA (2015)

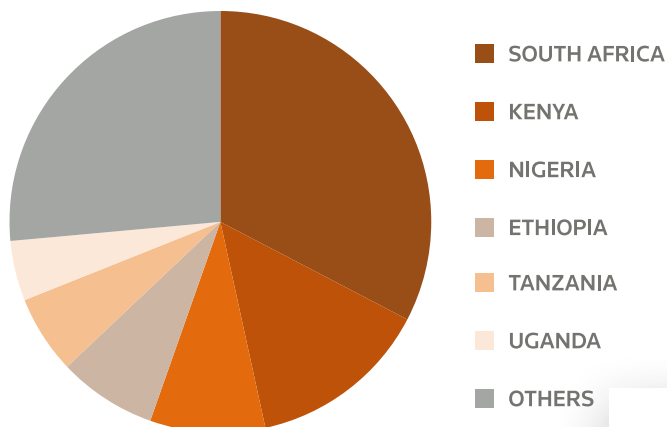

Graph 9: Top MENA Import Sources to SSA (2015)

From the African region side, as shown in graph 10, South Africa constitutes the main trade partner in 2015 with around \$9.0bn or 1/3 of the total, followed by Kenya \$3.8bn and Nigeria \$2.4bn. Together these countries account for 56% of the trade with MENA.

Graph 10: Top SSA Partners of MENA (2015)

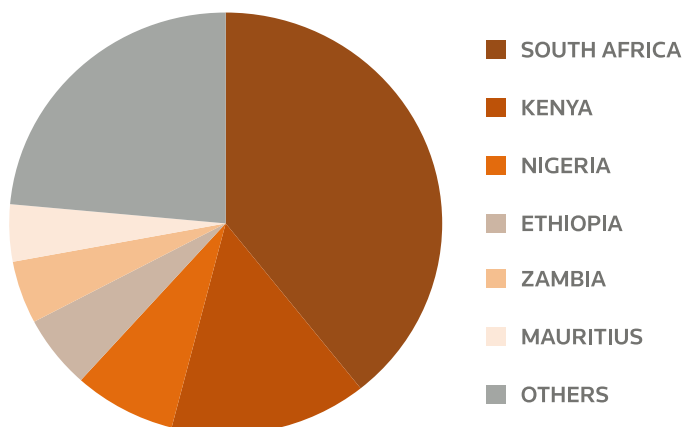

On the export level (graph 11), South Africa is the largest destination by far for Middle Eastern products with \$5.9bn or 30% of the total, followed closely by Kenya with \$2.7bn or 14% share.

Graph 11: Top SSA Export Destinations for MENA (2015)

Graph 12: Top SSA Import Sources to MENA (2015)

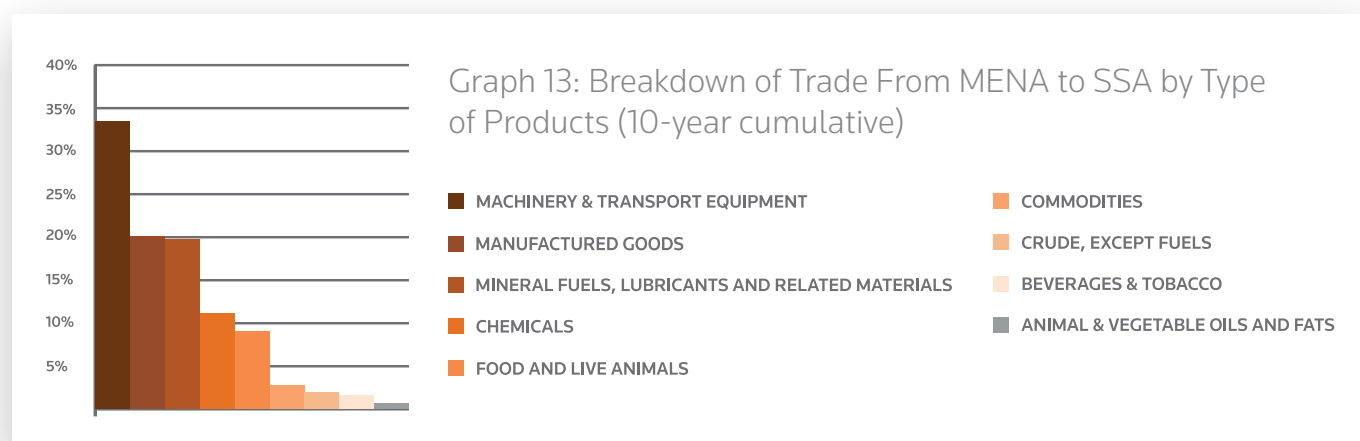

On the import level (graph 12), South Africa is also the largest source of goods for MENA economies with \$3.0bn or 39% share of the total, followed closely by Kenya with \$1.1bn or 15% share.

1.3. TOP PRODUCT CATEGORIES

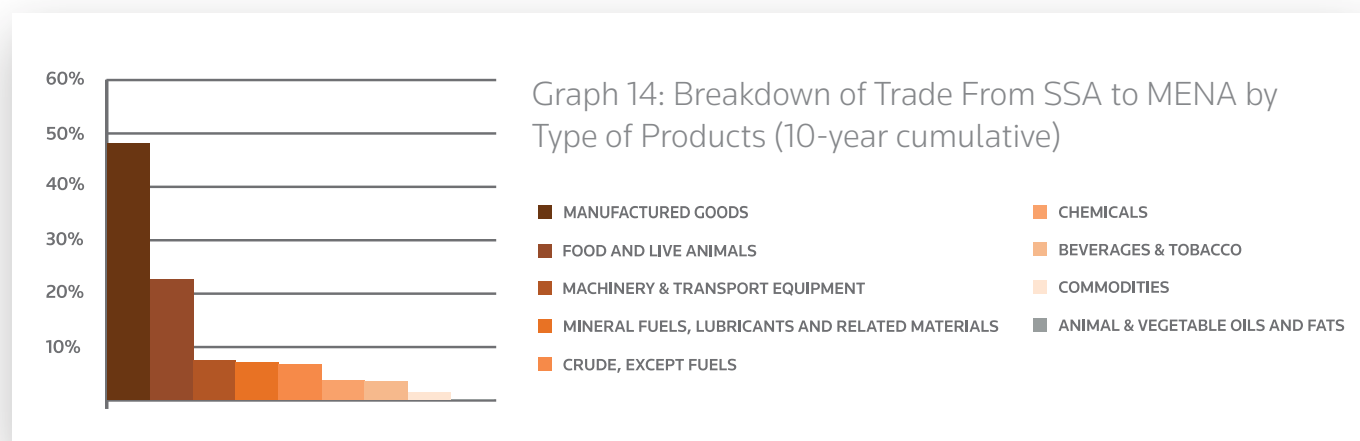

Type of goods being traded

Zooming into the type of goods being traded, MENA and SSA are noticeably exchanging complimentary products, with limited trades in similar categories. This trend leaves large room for increased bilateral cooperation between the regional economies, which provides solid foundations for many industries and businesses to expand their niche segments by exporting to other partner countries.

In fact, as shown in graph 13, MENA countries tend to export to SSA mainly machinery and equipment with a share of 33% of the total over the past 10 years, followed by manufactured goods with a 20%. Both categories accounts for more than half of MENA exports.

In respect to SSA exports to MENA, manufactured goods average nearly half of trades, followed by food and live animals with 23%. Both categories account for 71% of the total.

2. FLOW OF CAPITAL BETWEEN MENA AND SSA

Sustainable economic development

As MENA and SSA further their long-term sustainable economic development, businesses in both regions are tackling hefty investment opportunities in a large number of geographies and niche sectors. Add to this, governments are aggressively reforming in order to promote business-friendly environments and attract local and foreign capital. Within such context, we observe increased cross-border investment activities between companies in MENA and SSA, in the form of mergers and acquisitions by strategic or financial (i.e. private equity, venture capital) sponsors.

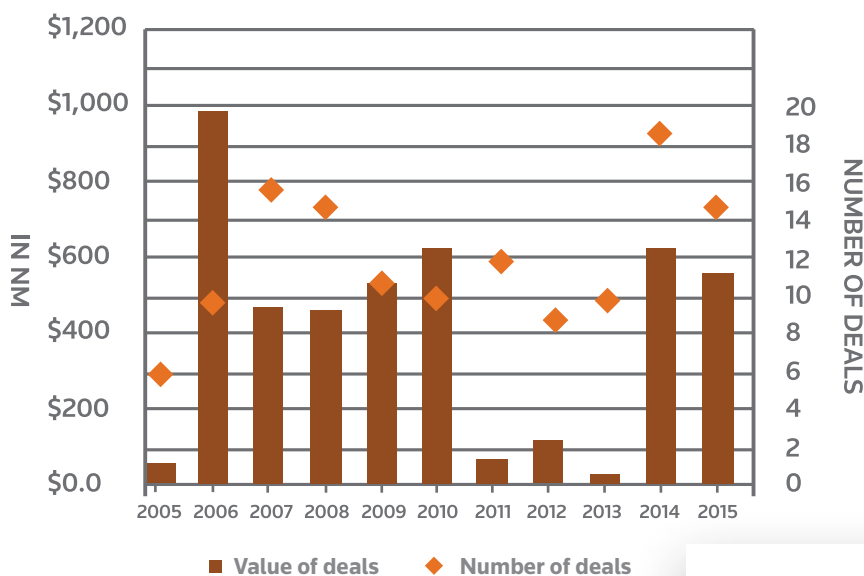

2.1. SIZE AND GROWTH OF M&AS

Increased business

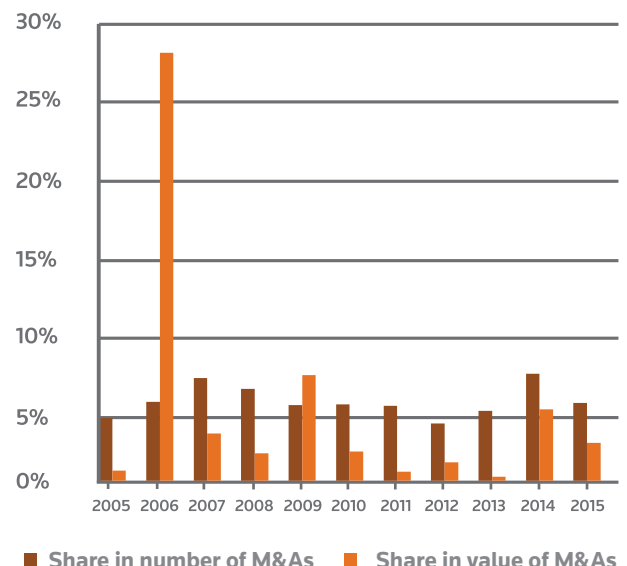

Deal activity has been on the rise during recent years between MENA and SSA regions, indicating increased business synergies between the operating corporates.

Based on data gathered from Thomson Reuters Eikon, total cross-border M&A deals (graph 15) between MENA and SSA cumulated, during the past decade (2005-9m2016), to around 149 deals for an estimated value of no less than \$24 bn. When compared to all deals by foreign companies in MENA and SSA (graph 16), these figures represent a steady share of around 5%.

Graph 15: Total Cross-Border M&A Deals Between MENA and SSA

Graph 16: Share of Cross-Borders MENA-SSA M&As in Total Foreign M&As in MENA & SSA

In particular, when analyzing the directional flow of deals, MENA companies is relatively more active in investing into Africa. As shown in graph 17, total number of M&As by MENA in SSA remained constantly elevated, totaling 119 during 2005-9m2016 versus only 30 from SSA in MENA. This pinpoints to the traction found by MENA-based corporates in opportunities offered by African countries.

Graph 17: Total Number of Cross-Border M&As Between MENA and SSA

■ M&As by MENA in SSA
 ■ M&As by SSA in MENA

Furthermore, MENA companies have been increasingly allocating their funds towards Africa as opposed to other parts of the World. During the past 5 years (graph 18), the share of SSA in their global deals rose from 8% in 2010 to 11% in 2015. This is compared to SSA firms allocating less than 8% of their global deals to MENA.

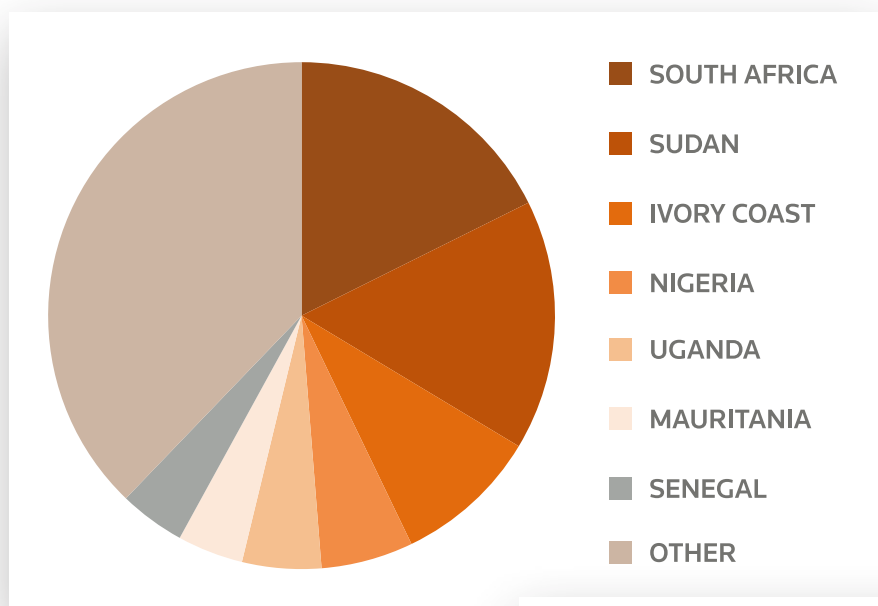

Graph 18: Fund Allocation by Regional Firms To MENA-SSA Versus Global Countries

■ Number of MENA deals in SSA / Number of MENA deals globally
 ■ Number of SSA deals in MENA / Number of SSA deals globally

2.2. TOP PARTNER COUNTRIES

Increased deal activity

In respect to MENA acquisitions in SSA, a small number of countries have been key drivers behind the increased deal activity. As shown in graph 19, during the period 2005-9m2016, South Africa constituted the main target geography for acquisitions by MENA companies with 21 deals or a share of 18% of the total, followed by Sudan 19 deals, Ivory Coast 11 deals and Nigeria 7 deals. In terms of acquiring countries, UAE accounted for the largest share with 33% of total deals by MENA companies in SSA, followed by Morocco 24% and Egypt 12%.

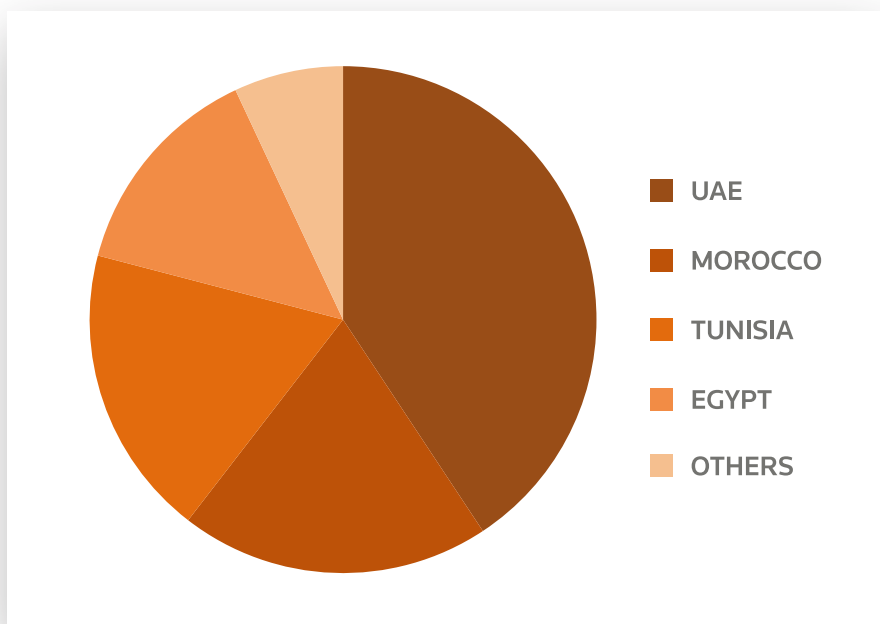

Graph 19: Top SSA Target Geographies By MENA Companies (2005-9m2016) - %

Graph 20: Top MENA Acquiring Geographies of SSA Companies (2005-9m2016) - %

In respect to SSA acquisitions in MENA, a similar trend of selected countries being the main focus dominates. In terms of MENA target geographies (graph 21), SSA companies favored mainly UAE with 33% of total deals, followed by Morocco with 30%. In terms of SSA acquiring companies in MENA, South Africa came in the lead with 65% of the deals. It is worth mentioning the low number of SSA deals in MENA which biases to some extent the analysis.

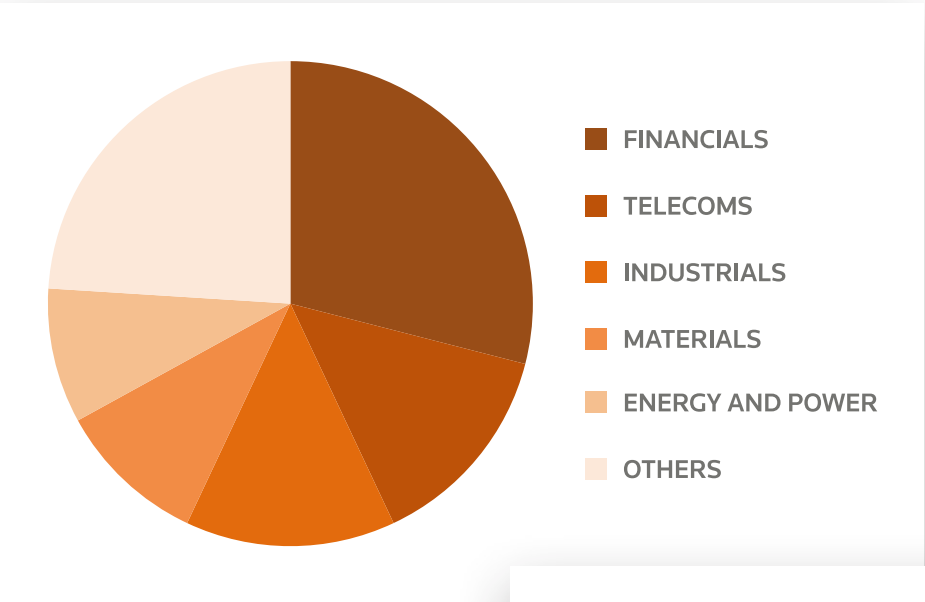

Graph 21: Top MENA Target Geographies By SSA Companies (2005-9m2016) - %

Graph 22: Top SSA Acquiring Geographies of MENA Companies (2005-9m2016) - %

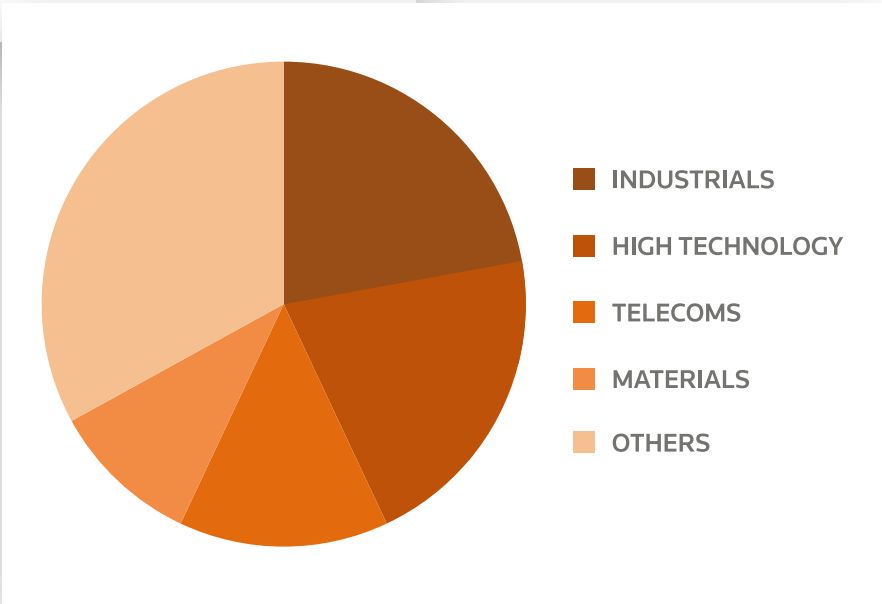

2.3. TOP SECTORS OF INTEREST

Businesses from both regions have been targeting key sectors of importance to the Arab and African countries. For MENA firms, M&As in SSA have been concentrated (graph 23) in sectors like financials, telecoms and manufacturing. These industries remained largely underserved and are witnessing solid growth. For SSA firms, M&As in MENA have been increasingly targeting the technology sector in addition to the strong industrial sector (graph 24).

Graph 23: Top SSA Target Sectors By MENA Companies (2005-9m2016) - %

Graph 24: Top MENA Target Sectors By SSA Companies (2005-9m2016) - %

2.4. TYPE OF DEALS

Financial sponsors have been largely active within cross-border M&As between MENA and SSA. In fact, as shown in graph 23, they account for circa half of the number of completed M&A deals during the period 2005-9m2016. Private equity players have been a strong component of the market, capturing 25% of the financial sponsor deals. Graphs 24 to 26 list the top PE deals in addition to top MENA deals and top SSA deals.

3. DRIVERS OF TRADE AND INVESTMENT ACTIVITY

3.1. TRADE AGREEMENTS BETWEEN MENA AND SSA

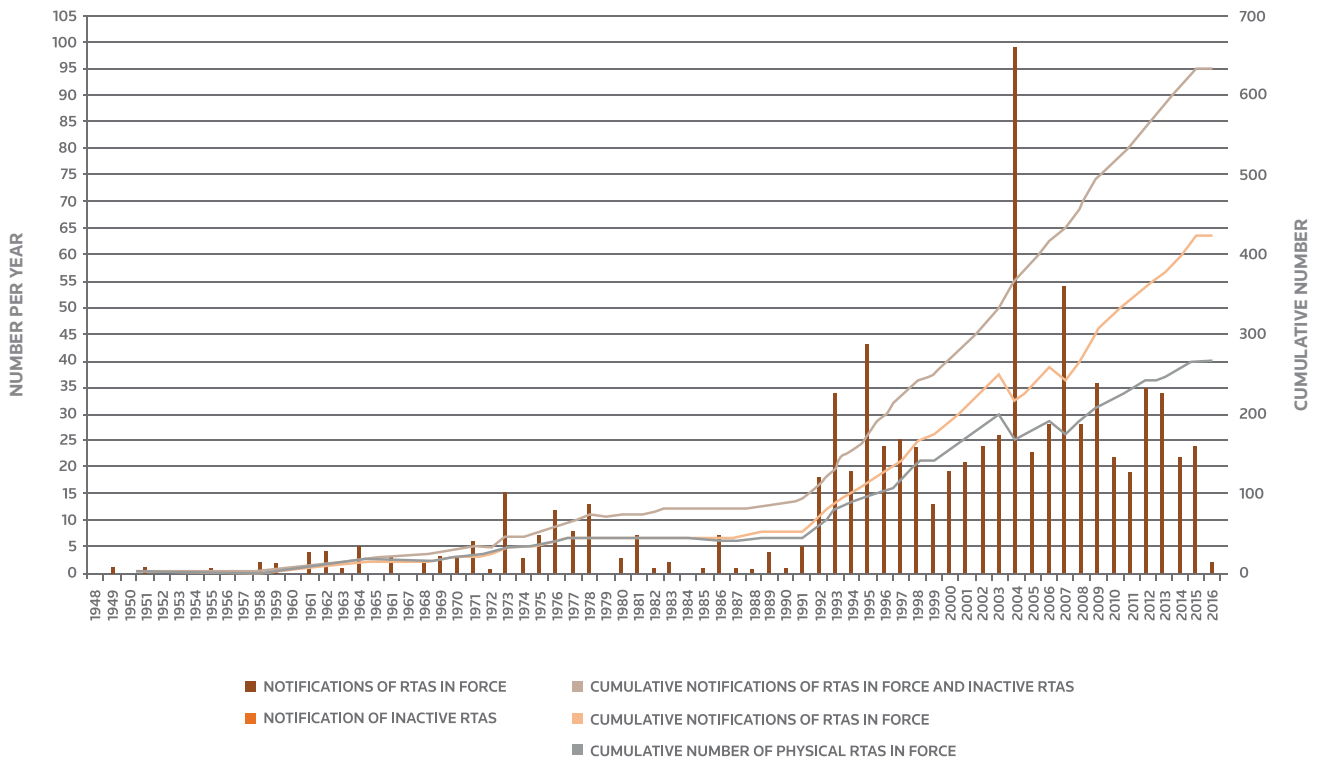

A series of regional and free trade agreements helped as catalyst to promoting the bilateral trade between MENA and SSA. As shown in table 1, 4 major trade agreements have been sealed in the past between both regions.

Table 1: Free and Regional Trade Agreements Between MENA and SSA

NAME	MEMBERSHIP	TYPE	DATE OF SIGNATURE

3.2. INVESTMENT AGREEMENTS BETWEEN MENA AND SSA

On the investment side, a series of agreements entered in force between MENA and SSA that helped to promote cross-border deals.

As shown in table 2, as per data gathered from UNCTAD's International Investment Agreements Database, both regions signed around 114 agreements during the past 60 years. It is noticeable the diversified base of parties participating in those agreements from SSA, GCC, North Africa and Levant.

3.3. MACROECONOMIC BACKDROP

The strong economic fundamentals in MENA and SSA when compared to other global regions are a focal driver in validating more inter-regional trade and investment relationships.

When looking into indicators such as economic growth (graph 28) and demographic dividend (graph 29 & 30), MENA and SSA are combining highly attractive catalysts for sustainable development over the long-term. Such scenario provides stable and solid ground for more integration between key countries in these regions.

Graph 28: Real GDP Growth During Past Decade

Graph 29: Population Growth

Graph 30: % of Population Aged <34 Years
